Contains Alcohol ethoxylate, CI3 EC 931-138-8; Acetic acid 240g/l EC 200-580-7 MAPP I5319

**For weed control in parks, amenity areas and church yards, on pathways, around domestic, industrial and public buildings, and similar situations.**

The Control of Substances Hazardous to Health (COSHH) Regulations may apply to the use of this product at work.

### DANGER

**H318 Causes serious eye damage.**

**H315 Causes skin irritation.**

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P302+P352 IF ON SKIN: Wash with plenty of water.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do.

Continue rinsing.

P310 Immediately call a POISON CENTER/doctor.

P332+P313 If skin irritation occurs: Get medical advice/attention.

P362+P364 Take off contaminated clothing and wash it before reuse.

EUH401 To avoid risks to human health and the environment, comply with the instructions for use.

Dangerous to bees. To protect bees and pollinating insects do not apply to crop plants when in flower. Do not use where bees are actively foraging. Do not apply when flowering weeds are present. Do not contaminate water with the product or its container.

### IMPORTANT INFORMATION FOR USE ONLY AS AN INDUSTRIAL HERBICIDE AND MOSSKILLER

**Situations:** Natural surfaces not intended to bear vegetation. Permeable surfaces overlying soil. Hard surfaces.

**Maximum individual dose:** 25 ml product per m<sup>2</sup>.

Maximum number of treatments: 6 per year.

Other specific restrictions: A minimum interval of 7 days must be observed between applications.

**READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.**

### SAFETY PRECAUTIONS

#### Operator protection

Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment. WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES, AND SUITABLE FACE PROTECTION (FACESHIELD) when handling the concentrate. However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection. Wear suitable gloves. Avoid contact with eyes. Do not breathe spray/FUMES. WASH SPLASHES from skin or eyes immediately. WHEN USING DO NOT EAT, DRINK OR SMOKE. WASH HANDS before eating and drinking and after work. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Take off immediately all contaminated clothing. Use only in well-ventilated areas. Use appropriate containment to avoid environmental contamination.

#### Environmental protection

Do not apply where rainfall is expected within 6 hours of application. Do not contaminate water with the product or its container. (Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads). To protect aquatic organisms respect an unsprayed buffer zone to surface water bodies in line with LERAP requirements.

DO NOT ALLOW DIRECT SPRAY from hand-held sprayers to fall within 1m of the top of the bank of a static or flowing water body. Aim spray away from water. Dangerous to bees. To protect bees and pollinating insects do not apply to crop plants when in flower. Do not use where bees are actively foraging. Do not apply when flowering weeds are present. RISK TO NON-TARGET INSECTS OR OTHER ARTHROPODS. See Directions for use. Applications must not be made via tractor mounted horizontal boom sprayers.

#### Storage & Disposal

KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place. Keep out of reach of children. Keep away from food, drink and animal feeding stuffs. This material and it's container must be disposed of in a safe way.

To avoid risks to man and the environment, comply with the instructions for use.

Safety data sheet available for professional user on request.

This product is approved under the Plant Protection Products Regulations.

#### DIRECTIONS FOR USE

**IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.**

**New-Way Weed Spray** is a non-selective weed and moss killer active against most soft plant tissue with which it comes in contact. Weeds and moss are controlled by covering their foliage completely and evenly with spray. Soon after spraying, the foliage of treated weeds and moss begins to wither and die. Plant roots are not killed and new foliage may grow, particularly from the roots of perennial weeds. Annual weeds with small roots and moss may die back completely but re-treatment will usually be necessary, especially to keep down perennial weeds. As for weeds, best results are achieved against tender, small weeds less than 10cm high. Ideally spray in spring and repeat as necessary over the growing season. Minimise drift from the target area.

#### Areas of use

**New-Way Weed Spray** may be used to control weed or moss growth in a wide variety of situations, such as in parks, amenity areas and churchyards, on pathways, around domestic, industrial and public buildings, and similar situations. Keep spray off vegetables, flowers, shrubs and lawns.

#### Application

Apply as a COARSE spray so that the moss or the weed leaves and stems are fully wetted but before the point at which spray solution drips from the leaves. Repeat against surviving weeds after a few days if necessary, when fresh growth is seen.

#### Mixing

Mix 1 volume of **New-Way Weed Spray** with 3 volumes of clean water, e.g. for a 16 litre knapsack sprayer mix 4 litres of **New-Way Weed Spray** with 12 litres of water.

1. Half-fill the spray tank with clean water.
2. Add the required amount of **New-Way Weed Spray**.
3. Fill the tank with more clean water to the required level.
4. Agitate thoroughly before use.

#### Weather

Apply **New-Way Weed Spray** on a dry day when rain is not expected. Rain after spraying may wash spray away from the leaves leading to a poor result.

Apply this product carefully. Ensure spraying takes place only when weeds are actively growing (normally March to October) and is confined only to visible weeds including those in the 30cm swath covering the kerb edge and road gully - do not overspray drains.

#### After spraying

Wash out sprayer after use. Keep people and animals off dense patches of weeds or moss until the spray has dried, often just 15-20 minutes. However, this is not necessary for treated areas containing only occasional, low or prostrate weeds or moss such as may be found on pathways. Use of **New-Way Weed Spray** may cause some surfaces to become slippery for a short time after application.

#### Subsequent planting

There are no residual effects of **New-Way Weed Spray** in the soil. Sowing or planting may be undertaken as soon as the moss or the weeds have died.

#### Care of equipment

Wash the sprayer and utensils, both inside and outside, thoroughly after use and allow to dry.
