

Covamat Plus Type F3

All natural fibre blankets have the disadvantage that in sunny periods the fibres quickly become dry and can be flammable by throwing just a cigarette on the blankets. The F3 range is fireproof according to DIN 4102-1.

The unique Covamat F3 grass fibres are of 100% European origin and specially treated with acknowledgement of the natural environment. These fire free fibres are 100% biodegradable within 36-60 months.

| Specification | Width (m) | Length (m) | Area (m ²) |
|--|-----------|------------|------------------------|
| 100% unique European grassfibres. Seed mix embedded in mulch-layer, top and bottom degradable polypropylene-mesh 10-20 mm thick, 800 g/m ² | 1.2 | 25 | 30 |
| | 2.4 | 25 | 60 |

| Fibre | Straw |
|--|---|
| Fibre Content (%) | 100% |
| Fibre Origin | Europe |
| Fibre Characteristics | Treated, 100% biodegradable |
| DIN STANDARD - Fire Resistant Proof | Acc. to DIN 4102-1 (top side of covamats) |
| CHARACTERISTICS | |
| Micro-Organisms | Bacillus Subtillis 1 g/m ² |
| Organic Fertiliser Type SOF-A-100 | ~ 100 g/m ² |
| Functional Longevity (months) | ~ 36 - 60 |
| Bottom Netting Size | 9 x 9mm |
| Top Netting Size | 19 x 36mm |
| Stitching Thread | Polypropylene-thread (brown), UV-degradable |
| Stitching Thread Tensile Strength | 6.5 Cn/dtex |
| Slope Recommendation | 1:1 or > |
| ASTM STANDARDS | |
| Tensile Strength ISO-10319 | 2.8kg-force per 20cm |
| D4595 Elongation (%) | 34 x 20 |
| D4491 Flow Velocities, Short Term | 4.26 m/s |
| Max Permissible Shear Stress (g/m ²) | 1100 |
| "n" value Roughness Coefficient | 0.014 |

The following standard seed mixes can be selected for the Covamat range. These seed mixes compliment and support each other giving multiple use and flexibility in application. Covamat contains fertiliser, micro-organisms and mulch to improve germination rates and soil conditions. Other specified regional seed mixes can be added if required.

| English Name & Advantages | Latin | 1A | 1C | 2A | 2B | 2C | Pioneer |
|--|---------------------|-----|-----|-----|-----|-----|---------|
| Perennial ryegrass; Quick to establish, wear tolerant and regenerative | Lolium perenne | 30% | 27% | - | - | - | 25% |
| Creeping red fescue; Binds, drought and salt tolerant, good erosion protection | Festuca rubra rubra | 30% | 27% | 35% | 25% | 25% | 25% |
| Chewings fescue; Low maintenance, good for dry low nutrient soil, shade tolerant | Festuca commutata | 30% | 27% | 30% | 30% | 25% | - |
| Smooth stalked meadow grass; Binds soil, good warer and regenerative qualities | Poa pratensis | 10% | 12% | 30% | 20% | 10% | - |
| Brown top bent; Cold tolerant, low maintance, rhizomous, very dense growth | Agrostis tenuis | - | - | 5% | 5% | 5% | 10% |
| Sheeps fescue; For poor soils, drought tolerant, densely tufted | Festuca ovina | - | - | - | 20% | 28% | 15% |
| Red clover; Dark pink flower, nitrogen fixing | Trifolium pratensis | - | 3% | - | - | 3% | 7% |
| White clover, spreads rapidly in moist soil | Trifolium repens | - | 2% | - | - | 2% | 7% |
| Birdsfoot trefoil; Used in dry, sandy soils | Lotus corniculatus | - | 1% | - | - | 1% | 2% |
| Yellow trefoil; Thrives in dry conditions | Medicago lupulina | - | 1% | - | - | 1% | 3% |
| Suckling clover (Irish Shamrock) | Trifolium dubium | - | - | - | - | - | 2% |
| Alsike clover | Trifolium hybridum | - | - | - | - | - | 4% |

| English Name & Advantages | Latin | 1A | 1C | 2A | 2B | 2C | Pioneer |
|---------------------------|-------|---|----|----|----|----|---------|
| 1A | | Rapid establishment and hard wearing, good for steep slopes and flood-endangered areas. Excellent sod forming and erosion protection, strong root development, salt resistant | | | | | |
| 1C | | As per 1A and with clover added for poor soils. <i>Most widely used mix.</i> Good for road embankments, swales and coastal applications. | | | | | |
| 2A | | Low maintenance, shade tolerant. Use in better quality soils. Strong root development and erosion protection. Salt resistant. | | | | | |
| 2B | | Dry stony soils, strong root development, erosion protection and salt resistant. | | | | | |
| 2C | | As per 2A with clover added for poor soils. | | | | | |
| Pioneer | | For poor soils with establishment problems. 50 g/m ² <i>Please note: this seed mix will incur an extra cost of £0.20m².</i> | | | | | |

Clovers and legumes are added where poor soil conditions exist but should not be used in good quality soils as they can dominate. They fix Nitrogen into the soil to improve fertility, which is good for swales and ponds.
