

Defender Pro

The Defender Pro tree shelter not only offers faster tree growth and increased survival rates but it is also able to reduce the cost of planting and maintenance. The square construction of the Defender Pro enables it to be delivered to the point of application 'flat pack' thus enabling larger quantities to be transported easier and at a lower cost than the conventional round rigid tree shelter. The unique staking and securing system of the Defender Pro ensures planting is done simply and swiftly whilst maintenance can be carried out with the same level of simplicity and speed. Manufactured from environmentally responsible and 100% recyclable UV stabilised polypropylene the Defender Pro has a built-in radial top lip to minimise abrasion to the tree stem and a perforated line to ensure the shelter splits open as the girth of the tree increases in size.

Technical Information

- Manufactured from UV stabilised polypropylene
- Harmless to the environment
- Durable twin-wall construction
- Designed to be transported flat pack
- Estimated life span 5 – 7 years
- 100% recyclable
- Radial top lip to minimise abrasion to tree stem
- Unique 'no ties' securing system to the tree stake
- Perforated line allowing the shelter to split open as the girth of the tree increases in size

Specifications

- Tree Shelter Heights – 60cm, 75cm, 90cm, 120cm & 150cm Cross section size – 8.5cm x 8.5cm
- Shrub Shelter Heights – 60cm and 75cm Cross section size – 15cm x 15cm
- Bundle quantity – 50 • Colour – Light Green

Applications

- Forestry
- Landscaping
- Fruit Growing
- Viticulture
