

Mona Plant System - Ring 77

Mona Plant System Rings have been developed specifically after requests from specifiers and contractors wishing to effectively and efficiently irrigate a tree rootball or a planter. It is the most efficient method of ensuring quick establishment and a healthy start for trees and plants.

Mona Plant System Rings have been installed in many projects across the UK and Europe. Particularly suitable for interior landscape projects with large planter installations. Ensures quick establishment of plants and healthy root development, provides a more robust solution to the watering of large trees reservoirs surround the rootball to provide a continuous source of water. The system forms a ring around the rootball to ensure optimal growth. Ideal for installation of rootball trees in hard landscaped areas.

Internal Diameter:

165cm

External Diameter:

190cm

Water Volume (L):

34

Benefits:

- For use in hard landscaped areas with rootball trees
- Install in large decorative planters for consistent watering
- Ideal for deep planting
- Suits interior or exterior landscaping
- Particularly suitable for the establishment of large trees

Installation:

1. Measure the dimensions of the rootball or planter and select the correct size Mona Ring. For bespoke sizes please contact the Green-tech technical team.
2. Cover with growing media, ensuring there is a 150mm depth between roots/rootball and the Mona Plant System Ring.
3. Ensure the upright filler pipe stands proud of the nursery line/planter.
4. Back-fill with growing media and plants as per specification
5. Fill with water until the float within the filler pipe rises to the fill level.
