

gt Soil Improver

- Produced using a variety of plant material from domestic and municipal sources.
- Composted in an open windrow system following the guidelines set out in PAS100.
- Screened using a Powerscreen SM518 with 10mm screen.
- 95% of particles fall within a 0-10mm range
- The pH range is 7.0 to 8.5.
- Moisture content is in the range of 40 to 60% (green weight basis).
- The weight/volume ratio (bulk density) is normally in the range of 450 to 650Kg/m³.
- Levels of human pathogens, potentially toxic elements and physical contaminants are within the limits specified by PAS100.
- Dark brown/black in colour with the feel and consistency of soil.
- Whilst all practical measures are taken to remove foreign matter such as metal, glass and plastic we cannot guarantee the complete absence of all extraneous material.
