

Technical Data Sheet

JOHN CHAMBERS DUAL-PURPOSE WILDFLOWER MIX

Wildflower Seed & Conservation

The John Chambers Professional Dual-Purpose mix is a blend of native annual and perennial wildflower seeds and can be supplied with or without grass seed. The mix is ideal where impact is required in the first growing season.

Applications

- The best results come from well prepared areas and good maintenance for the developing sward, as and when necessary.
- It is vital to make sure that the sward is cut back after seed heads have dispersed in late-Summer or Autumn and always remove the cuttings.

Features

- Versatile in cost and function to suit a variety of projects and briefs.
- The mix includes reliable species that are successful in most soil types and scenarios, this mix is a great choice for those that do not know the exact constitution of their soil.

The Mix Includes:

The Cornfield Annual Species

Provides instant colour and impact in year 1.

- Poppy
- Chamomile
- Cornflower
- Marigold
- Corncockle

The Perennial Species

16 slower-growing species, ready to spring forth from Year 2 onwards. Including:

- Oxeye Daisy
- Lady's Bedstraw
- Knapweed
- Salad Burnet

Additional Info

- Available in 3 options to suit all budgets and projects:
- 100% Wildflower Mix
- 50% Grass Seed + 50% Wildflower Mix.
- 80% Grass Seed + 20% Wildflower Mix.
